

Kalamazoo Christian High School Mathematics Placement Procedure

1. An incoming freshman who has completed the 8th grade Pre-Algebra course will be placed in Sequence 1 beginning with 9th grade Algebra.
2. An incoming freshman who has completed the 8th grade Algebra course will be placed in Sequence 2 beginning with 9th grade Geometry AH (Accelerated Honors).
3. If, in the opinion of the 8th grade math teacher, in consultation with parents, an 8th grade Algebra student needs to repeat Algebra, he/she will be placed in Sequence 1 rather than Sequence 2.
4. Students will need to stay within the assigned sequence from freshman year through all of the years they plan to take math courses. Sequence 1 is a single-track system. Sequence 2 offers a two-track system with built-in transfer points where decisions can be made about whether or not a student should continue in the Accelerated Honors track.
5. An incoming freshman, who has completed the 8th grade Algebra course, will not be able to start out with the 10th grade Geometry course in Sequence 1 but will need to begin in Sequence 2.
6. Two years of mathematics are required for KCHS graduation. Many students elect to take three and even four years of mathematics.

Mathematics Courses Offered:

- Algebra
- Advanced Algebra AH
- Geometry
- Functions-Statistics-Trigonometry (FST)
- Geometry AH
- Pre-Calculus
- Advanced Algebra
- Advanced Placement Calculus

Two Possible Sequences

Sequence 1

Sequence 2 (AH=Accelerated Honors)
