

KALAMAZOO CHRISTIAN SCHOOLS

Undeniably Christian. Academically Excellent.

August 25, 2023

Dear Parents and Staff of Kalamazoo Christian High School (KCHS),

In compliance with the United States Environmental Protection Agency's (EPA) Asbestos Hazard Emergency Response Act (AHERA), Kalamazoo Christian High School had asbestos re-inspections performed at the high school building for asbestos-containing materials. The EPA requires the school to perform re-inspections of the asbestos materials every three years. In early 2022, a State of Michigan accredited Asbestos Inspector performed this re-inspection and a State of Michigan accredited Asbestos Management Planner recommended actions the school should take to safely manage asbestos-containing materials in the building.

The results of the re-inspection are on file in the Asbestos Management Plan in the school's administrative office. Anyone is welcome to view this plan any time during normal school hours. Please contact the high school office if you have any questions.

Sincerely,

Dirk Walhout
