## Middle School Programming

---

This year, a new class has come to the Middle School on Fridays - Outdoor Education! As we develop the 12th street campus and enjoy more of God's creation, Middle School students will be called upon to help build and construct parts of our outdoor education classroom and initiatives as well as expanding our Science programming in the grade to include raising bees, caring for fruit trees and having chickens in a coop year round.

Another class that has been added for all of the Middle School is called W.I.N (What I Need). This is an intensive reading program to strengthen students' reading skills. As all of our students are being asked in their education to read textbooks and articles, this program is designed to help our students gain confidence and skills in their reading aptitude.

In our 7th grade encore lists this year we have added ASP+ for both Math and Writing. Mrs. Webb has designed these classes to provide extra challenge and depth to those students who have shown an aptitude either in their classes or in standardized test scores.

- Joel Netz, Middle School Principal
